L3HARRIS™
FAST. FORWARD.

SUPPORTING URGENT COMMUNICATIONS FOR HEALTHCARE

As the public health crisis grows, health care professionals are engaged in a herculean effort to save lives and heal the sick. Providing the best patient care demands rapid, large-scale communications with multiple agencies and workers in and out of hospitals.

Communicate with your medical teams at the touch of a button

> Send information and data through secure group voice and text messages
> Share information with teams such as patient inflow, emergency rooms, COVID-19 test sites and drive-in clinics
> Locate and track out-of-building health care workers
> Post on-call status of mobile, in-hospital and field unit staff

Use your smart phone or tablet

> Connect over LTE or Wi-Fi®
> Compatible with your Android™ and Apple® iOS smart phones, tablets and Windows® PCs
> No additional equipment is needed

Simple to activate and use

1. Your system administrator contacts **Ci** to set up user accounts
2. Users download the free BeOn app from the Google Play™ store or Apple® App store
3. Users sign on and start using BeOn service provided by **our hosted core**
4. User-friendly online tutorials provide the training needed

Thank you!
