

# HindSight™

## Multimedia Logging Recorder

HindSight addresses many of the challenges faced in mission-critical communications environments and prepares you for where you're going.

Records telephony, radio calls, VoIP, RoIP, Text-to-911 (SMS), screen video, and more.

NENA NG 9-1-1 & i3    APCO P25

## Designed For Your Organization

### Share Recorders (Costs) Without Sharing Data

Restrict access to records by user, team, department, agency, or organization. A single recorder (and associated costs) can be shared across multiple departments or organizations while only allowing appropriate access to recordings.

### Never Miss A Recording

Recordings are automatically backed up to a secondary storage location. Real-time fault monitoring alerts you if something goes wrong and helps ensure 24/7/365 up-time. Recorders can be set up in redundant or geo-diverse\* redundant configurations. \*Geo-diverse recording dependent upon access to audio inputs at geographically separated locations.

### Streamline Efficiency & Operations

Our entire end-to-end solution, from deployment technologies to in-software features, is designed to cut initial and long-term costs, increase user productivity, reduce time and costs for system maintenance and upgrades, and more.

### Take Advantage of IT-Friendly Recording

Deploy on-premise or in a virtual environment, and be cloud-ready. Recordings are accessed via internet browser—no clunky software upgrades. All hardware is industry-tested Dell COTS. Built-in real-time fault monitoring is included with every recorder.

## Designed For Your Users

### Tools You Need, At Your Fingertips

Find a record, tag, bookmark, export or download it, and redact sensitive information—within the same software window. Visualize interactions on a map using ESRI, Google Maps, or Bing Maps. Plus, powerful playback features make examination seamless.

### Spend Less Time Searching

Locate records quickly with powerful search and custom, savable filters. Search the entire database or sections in a variety of ways, including searching by location on the map. Tag records for easy grouping, or bookmark a timestamped location.

### View Ongoing & Recent Interactions

Quickly access and replay current and recent activity across all channels, system-wide. Users can also see the location of ongoing interactions on a map. All Instant Recall features are built into our main software window.

# Designed For Your Communications

## RADIO & ROIP

- EFJohnson/Kenwood P25
- L3Harris™ P25 w/wo Encryption
- Motorola Solutions™ (formerly Cassidian & Airbus) P25, w/wo Encryption
- Motorola Solutions™ P25 Astro, w/wo Encryption
- MOTOTRBO™
- Tait DMR
- Tait P25, w/wo Encryption
- Telex
- ... and more

## TELEPHONY & VOIP

- Analog
- Avaya SIP/H.323
- Cisco SIP
- IPC
- Mitel®
- Nortel
- Shoretel
- Siemens
- SIP
- ... and more

## DISPATCH CONSOLES

- Avtec Scout
- Catalyst
- L3Harris™ Maestro and Symphony
- Motorola Solutions™ MCC7500, MIPS 5000, WAVE
- Telex Vega
- Zetron® ACOM & MAX Dispatch
- ... and more

## NG 9-1-1 PSAPS

- Compunetix
- Emergency Call Worx
- Motorola Solutions™ (formerly Airbus) Vesta
- Solacom
- Intrado (formerly West)
- ... and more

## A Comprehensive Mission-Critical Solution

### ACCESS CLIENT

#### HindSight 4

Our latest release allows users to access recordings securely via a web browser. All user functionality is built into the main recording client; no third-party add-ons required.

### RECORDING HARDWARE

#### Dell COTS Servers

Capture and store recordings on a variety of Dell COTS servers and configurations, depending on your recording, storage, backup, and security needs. Redundancy available.

### SUPPORT

#### ExaCare™ Support

Exacom-direct support is available for the life of each recording system. All staff are in North America, with regional support throughout the US and Canada.

## Part of Exacom's Distributed Recording

HindSight is part of Exacom's distributed recording ecosystem. Each recording component in the ecosystem can be used as a standalone unit or linked with other recorders for a flexible, scalable, and geographically-distributed recording solution.
