

CAPABILITY STATEMENT

Core Competencies

Communications International (Ci) is a systems integrator headquartered in Vero Beach, Florida, that specializes in the design and implementation of critical communications networks.

Ci specializes in providing customized communication solutions and quality implementation and support services to meet the needs of those in the federal, state, and local public safety, utility, and transit industries from concept to completion.

Our competencies include:

System Design and Implementation

- Radio System engineering and implementation
- Network optimization
- Equipment repairs and maintenance
- Site and project management
- Programming and calibration
- Software integration
- Tower and general construction
- Training
- Vehicle equipment installation

System Repair and Maintenance

- Equipment Programming & System Optimization
- Installation & Repairs
- Police Radar/Laser Certification, Repair, & Install
- Flat Rate Radio Repair Depot Contracts
- Preventative Maintenance Programs
- Customized Maintenance Agreements
- BDA/DAS System Maintenance
- Programming

Other Services

- Onsite/In-House Installation (Radio, Lights, Radar)
- Dispatch Centers and Call Taker
- DAS System Design, Installation & Testing Services
- Camera & Access Control Design and Installation
- Tower Site Repairs & Maintenance
- Fire Station Alerting Systems
- Base Station & Repeater Installation
- Concealed Weapon & Vape Detection
- Mass Notification Systems
- Generators and UPS Systems
- Paging and Netclocks

Vehicle Installation & Upfitting

- Radio / Intercom / Communication Units
- Light bars/Sirens
- Alerting Systems
- After Market Accessories
- Police / Fire / EMS / Commercial Vehicles Serviced

Ci has tackled projects large and small, simple and complex, new implementations and upgrades. From Las Vegas to Boston and from Trinidad to Tasmania, we're experts with domestic, federal and international experience. Whether implementing complex wide area systems, enhancing existing networks, system troubleshooting or providing maintenance and support and equipment, we give you the knowledge and experience expected from a manufacturer with the personal attention deserved.

A sample our successful projects include:

- ✓ **Florida Department of Corrections FL** – Design, implementation, integration and maintenance communications systems for all prison facilities throughout the State of Florida.
- ✓ **State of Florida Law Enforcement Radio System (SLERS)** - Key integrator and maintenance provider of more than 150 RF and microwave sites across the state from our nine (9) Florida service facilities.
- ✓ **Massachusetts Bay Transportation Authority** – Design, implementation and integration of a communications and vehicle location network covering the entire Bay area. The network provided coverage above and below ground utilizing communication towers and bi-directional amplifiers.

CAPABILITY STATEMENT (con't)

- ✓ **Trinidad and Tobago** – Design, implementation and integration of the Country's nationwide E911, Emergency Vehicle Location System and Computer Aided Dispatch System.
- ✓ **Republican National Convention** – Design, implementation and integration of radio communications system that served as the main interoperable solution for the hundreds of law enforcement agencies that provided security for the convention.

Differentiators

Successful wide-area radio communication systems depend on each individual piece working reliably and seamlessly with every other part of the whole. Ci has established an experienced senior-level team with years of relevant experience and proven expertise in complex communications systems' design, integration, deployment, and support.

Ci provides:

- Proven depth of experience in implementing turnkey, reliable Project 25 trunked land mobile radio single-site, multi-site, simulcast, and switching land mobile radio communications systems.
- Flexible, highly responsive, innovative, future-ready, and cost-effective solutions.
- Turnkey solutions and custom design services to enable reliable communications across regions while allowing agencies to get the most from previous investments in systems, software, and resources.
- True systems integrator services with successful experience in incorporating, supporting, and servicing legacy systems while adding in new elements as needed.
- Project teams comprised of highly qualified and certified engineers and technicians who are poised and ready to work closely to finalize custom turnkey comprehensive implementation plans to fit any schedule and budget.
- Investment in discovering, analyzing, and understanding the existing system and how radio communications can help facilitate and enhance operations.
- Strong, long-term relationships with the many leading manufacturers in the industry to give a comprehensive solution with the best technologies available.
- Experience as one of L3Harris Corporation products' largest resellers and implementation providers.
- Eighteen locations throughout the Southeast assure the benefit of an extensive range of local experience and commitment and offer the highest level of service with a single point of contact and no finger-pointing.
- Comprehensive acceptance and coverage RF test plans and testing, ensuring project goals and deliverables are met.
- A full range of field services to ensure the seamless operation of these new and existing systems, including:
 - 24 x 7 remote monitoring of system health
 - 24 x 7 on-call support
 - Tier 2 support for local staff or self-maintained
 - Local presence and System/Operational Management

CAPABILITY STATEMENT (con't)

Corporate Data

Communications International (Ci) is a wireless systems integrator headquartered in Vero Beach, Florida. Our specialization is designing, supporting, and implementing critical communication systems across the Southeastern United States.

With a history spanning nearly half a century, Ci was founded with a core mission: to serve the public safety community by delivering top-tier services and solutions to fulfill our customers' telecommunication requirements.

Our service footprint extends across seventeen strategically placed locations in Florida and the Southeast, reflecting our rich history of dedication and integrity. Ci takes pride in cultivating genuine partnerships with our customers, serving as their single point of contact. We bring together cutting-edge technologies, time-tested methodologies, unwavering commitment, and the expertise of our 180+ employee-owners.

Ci is a prominent reseller and implementation provider for critical communications products from L3Harris, Kenwood, and Tait. Our exceptional dedication and proficiency in land mobile radio have earned Ci recognition from L3Harris, designating us as a Regional Center of Excellence (RCE), a distinction shared with only one other entity in the United States.

Ci holds several critical contract vehicles and teaming relationships to facilitate efficient and cost-effective procurement.
